Security & Auth

API Integration

System Architecture

Compiler & Language Design

Dev Tools & Versioning

HOBBIES

- Reading
- Teaching
- Research
- Writing Code

PROFILE

A passionate full-stack developer, problem solver, and creator of innovative systems that make real-world impact. I build fast, secure, and scalable applications using modern technologies like NodeJs, NestJs, Express, MongoDB, C#, Xamarin.Forms, .Net MAUI, SQL Server etc. and I enjoy transforming ideas into fully functional digital solutions.

EXPERIENCES

- Freelance Full-Stack Developer** **2021 - Present**
Building scalable web applications and provided tailored software solutions for various clients
- Open Source Contributor** **2022**
Contributed to various open-source projects, collaboration with developers worldwide and enhancing my coding skills
- Junior Backend Developer** **2023**
Joined Zas Resources as a backend developer, working on building and maintaining web applications
- Lead Backend** **2024**
Took on the role of a lead backend developer, overseeing architecture and implementation of other developers
- Intern at Stone Tech** **2025 - Present**
Learning and exploring with fellow developers, by teaching, building projects and sharing of resources.
- Scorche Pay** **2025 - Present**
Join as a Senior Lead backend developer, working on major projects, payment processing systems and enhancing my expertise in fintech solutions.
